

Miss Lynn Summary

Initial Clinical Presentation

- Sarcoid granuloma
- Treatment- Surgical Excision

11/18/2010

11/18/2010

One Day Post-Surgery

- Granuloma's were surgically excised

12/9/2010

12/9/2010

Nineteen Days Post-LLLT

- Documented tissue granulation, reduced pain, enhanced mobility, and accelerated healing

12/28/2010

12/28/2010

One-Month Post-Op

- Remarkable tissue granulation, skin contracture, and reduced pain (as observed in improved equine behavior).

1/9/2011

1/9/2011

Conclusion

- Following only 19 days of LLLT
- Treatment restored mobility, prevented development of tissue- and neuro-plasticity, lowered risk of nosocomial infection, and accelerated wound healing

12/9/2010

10/9/2011

Update on Miss Lynn

- Miss Lynn has continued treatment with the Erchonia laser over the past month and has seen dramatic changes in her recovery.
